

**Comments about IB within Iles School from Parents who completed the IB Survey.
March, 2015.**

Wonderful impact!

IB has been a wonderful fit for an already excellent school. The inquiry curriculum and the enthusiasm/dedication of the teachers is amazing! We feel that IB should be extended into a middle and a high school in Springfield.

My child enjoys attending Iles school.

We (the family) have tremendously enjoyed our son's first year at Iles so far. I am overjoyed with what all he learns.

We are very happy with our child's progress in educational, social and physical skills. He has shown development in all areas and specially in science.

You are doing a good job. You are awesome school.

I feel the IB program is a well rounded approach to learning and has greatly benefited my child.

I am very impressed with Iles and how well my son is doing.

Our family is SO thankful for Iles being an IB school. Our kids are advanced and we would have lost them in the regular District #186 program. We would have had to look into a private school for the level of learning necessary for each of them. Iles is GOD SEND!!

Would be good to have more parental direction such as resources children can use at home or resources for parents to help child learn Chinese/reinforce language at home. LOVE IB! Wish there was Middle School/High School here that had IB.

I feel extremely fortunate for my daughter to have an opportunity to attend and learn at such a wonderful school.

Overall great experience. Thank you to the Iles school staff.

We feel very lucky that our daughter got into Iles. We hope our other daughter can attend Iles, too!

Since attending Iles, my daughter has grown in leaps and bounds, academically. She loves going to school as much for her classroom time as she does the social aspect. I look forward to many more years with Iles and the young lady, they are helping me mold.

We love Iles School and the IB Program!

We love Iles school! Keep up the great work!

My child is no longer bored at school. She is excited to learn new things. Chinese class is one of her favorite.

We love Iles. My children are exposed to the best teachers, experiences, ideas, projects and diversity available in Springfield. I have never regretted my decision to send my two kids to Iles.

Iles staff has very devoted teachers and support staff and involves students and families in every aspect of their learning education and life skills taught.

So fortunate to have our son in this remarkable school..

Chinese should be offered in high school if offered in grade school.

Love that my child is in an IB school; and has the influence of IB in middle school. An IB high school is really needed!

Iles is a great school! My daughter has learned a lot since she has been attending Iles.

Iles has great teachers + staff that care about the students' education.

We love Iles!

My child enjoys attending Iles School.

The teachers do a fantastic job, shaping these young inquirers. IB encourages analytical thinking.

IB program at Iles is helping my kid to think globally and understand how he is learning is applied in the world. The program is providing opportunity for him to research and understand current challenges in the development to be reflective and open-minded. Thanks so much Iles staff for IB students.

I am so happy that my child has the opportunity to attend an IB school as it has significantly increased her awareness. I will do whatever it takes to keep our IB school!

Iles' teachers and staff work very hard to create an interdisciplinary environment that challenges my daughter and provides a unique learning experience. I appreciate so many aspects of the IB programme, and it is impossible to list them all, and I cannot imagine how it can be improved!

I would say yes on most IB traits + sometimes on others. Overall she is developing into a responsible student.

My child has flourished in all areas while attending Iles. She is so eager to learn new things and has grown in her self-confidence and communication skills. I am so incredibly grateful for Iles.

Our family recently attended a foreign language visit at Southeast H.S. My Iles student remarked that she wished Chinese was offered at the high school level.

We love the inquiry based approach.

We really appreciate the IB curriculum. Our kids have had a wonderful learning experience at Iles.

IB has been a good experience.

Iles has been a great school for my daughters. IB education along with our great teachers makes Iles a special school.

Love this school because of its staff, curriculum and the IB curriculum...helps greatly in bringing up our kids as global citizens with a high degree of cultural sensitization

Iles has been a great experience for the kids. They've been happy and we've been happy, too.

We love Iles!

We feel our children would have benefitted from Spanish instruction.

I am thankful for Iles School where IB values are an everyday part of my child's educational experience.

Iles teachers and administrator go out of their way to communicate with parents. We feel the IB education our child has received has made her a better student and person.
