

## Think Spring! Grow an AnswerGarden!

Looking for a quick, fun, no-hassle way to engage and assess your students in your classroom? Look no further than [AnswerGarden](#)! AnswerGarden is a collaborative, web-based word cloud resource, which can provide amazing, just-in-time opportunities for brainstorming, comprehension checks, and collaborative-thinking feedback.

It's so simple! Just start with a question or prompt and share your garden's link with your class. Students can submit their own answers (20-40 characters) or click on an existing answer to submit. Soon, your AnswerGarden's word cloud will begin to grow. The more a word or phrase is repeated, the bigger it grows.

AnswerGardens can be used live, in your classroom or embedded on your webpage or blog. You can check out some ideas of [how AnswerGarden can work for you](#).

Give it a try! Visit our [AnswerGarden](#) and respond to the question.
