

# Edmentum Instructions for Students

Website: login.edmentum.com

You Should Use **CHROME**

Account Login: SSD186

User Name: \_\_\_\_\_

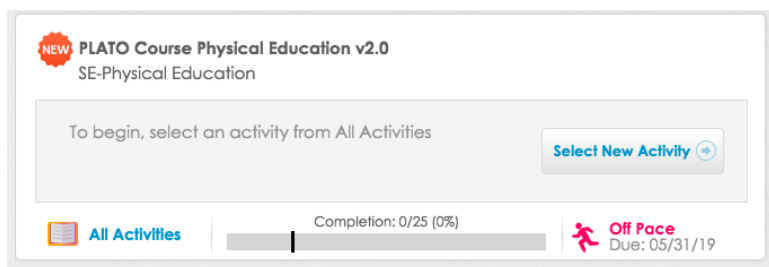

Class: \_\_\_\_\_

Password: \_\_\_\_\_

\_\_\_\_\_

When you log in for the first time, you will see your home page.

Find the box that looks like this:

You can either click select New Activity or click All Activities. They will both take you to the same place.

You can click on Orientation, Syllabus, and Transcripts if you want to, but don't have to.

- To get going in the course, click on Unit 1.

**Tutorial:** Watch the tutorial, answer questions. There are discussion questions within the tutorial. You must type something in the boxes. This is just for your reflection. This will not be graded.

**Mastery Test:** After the tutorial, there is a Mastery Test. Think of this like homework or a quiz after the section. You must get a 60% on it to move on. If you take it 3 times without passing, it will say you are locked out. You can **UNLOCK IT YOURSELF** by going back through the tutorial again.

**Post Test:** At the end of each unit, there is a Post Test. This is like the end of the chapter test. It will be locked. You have to ask the teacher to unlock it. You have to get a 60% or better to move on.
