

What work will have the most positive impact within the next 5 years?

Upgraded classroom space and athletic complexes

Athletic facilities and classroom space

Classroom expansion will have the most positive impact. Expansion of classrooms versus athletic facilities will reach every student. We need more cutting edge math and science laboratories to make our district more competitive.

Athletic facilities and classrooms

High school reno and improve athletic facilities

High schools and athletic facilities

Updating the high school and athletic facilities.

Improve athletic facilities; 25% of students participate!

The athletic facilities, specifically the field houses.

Building safety - number one. Athletics - build a stronger sense of community among 186. And revenue!

Athletic facilities

Athletic facilities

Athletic complex

Gyms and athletics. That brings people in

Athletic complexes and lhs

Athletic facilities

Athletic facilities

Building the athletic fields

Classroom space and gymnasiums for all schools

Creating additional classrooms so as you build larger high school and take over additional land (houses) it will impact current school populations.

Classroom additions and 21st century updates to school buildings

Smaller updates and additional classrooms across the schools

Updating middle schools with expanding gyms, cafeterias and classrooms

More classroom space and reforming administrative overhead

Additional classroom space

Classroom space

Increase classroom space.

Upgrade classroom spaces.

Expanded office and classroom space for flexible work with students

classroom space

Classroom space and community pride

More classroom space

Extra classroom space

Closing gaps across the board.. additional classroom space

Tech-friendly classrooms

Removing of mobiles- classrooms for all

Create more learning space at elementary schools Improve toilets and water fountains at many old buildings

Cafeteria and gym spaces for middle schools

New schools will stem the outflow of families to other districts.

High school upgrades

The community seeing the physical transformation of our school buildings into state of the art learning environments.

Middle and elementary schools.

Middle school upgrades

Updating our schools

Comprehensively reconstruct LHS & start with the high schools with the facilitation upgrades.

For starters - ANYTHING! Make something happen. Start at the beginning. Early Childhood and the elementary schools.

Middle schools to have expansion to create 6th grade pods!

High schools and alternative school renovation.

Updating High Schools

Updating high schools

the elementary and middle school updates!

What work will have the most positive impact within the next 5 years?

Updating all of the schools. Education first.

High school construction

Updating the middle schools

Space and upkeep of the facilities

Equitable space

Equitable space for special education and upgrades to allow us to grow technology

Social emotional learning Space for small group learning

Extra space

Space for flexible learning

Creating active learning environments for students

Welcoming and secure entries

SLA and alternative upgrades

Personal responsibility and parental involvement

The state catching up on money owed to us so we can continue

Find funding to go with health life safety

Mobiles gone

Any upgrades to facilities will be great!

Accountability

More counselors

LEARNING ENVIRONMENTS

ELC expansion, GAP improvements

Filling in the gaps upgrades district wide

New construction

Cost analysis is essential

Fill in Gaps

Fill in the gaps

Fill those gaps!

Fill in the gaps

Seeing new construction will help build positive community attitudes

Athletic facilities

Filling the gaps

Social Emotional Work

The health life safety upgrades

Retiring oldest buildings

Revamping alternative to be progressive learning environments.

New buildings updated to the 21st century

Filling in the gaps

New Facilities

State of the art learning environments that also look inspiring.

Academic enhancements at every learning level

A quality plan in general that takes us down a great path....

Competition ready field houses

New facilities

New construction/renovations

Texhnology

Creating the additions.

Elementary building

Renovating and updating alternative sites

What concerns you most about this plan?

1.funding 2. Priority 3.equity 4. How the learning environment is affected

Passing a referendum to fund it. County wide sales tax instead of property tax makes most financial sense

Will it take a referendum to fund these projects?

Funding it.

Funding

Cost/ funding

Funding and picking what project is the top priority

Families staying in the district to support and fund these projects.

That Springfield residents will realize the value of these changes as funding discussions begin

Funding

Funding

Funding \$\$\$\$\$ Taxpayer support

Families staying in our district to support the process to fund it!

Funding

Where is funding coming from ??

Cost and funding

FUNDING

Funding....

Cost. Funding.

Unknown cost and funding

Funding

I am concerned about the variables in cost. I feel like we need to have a reliable cost analysis to make an informed decision regarding which plan is even feasible. We cannot ask the community to pass a referendum without a strong plan.

The 20 - 25 year timeframe

Money taxpayers supporting the referendum

Money and the need of a referendum.

Selling the referendum, logistics with students while construction is going on population fluctuations and new home school boundaries if new sites are built.

Having equitable opportunities for students in special education as well as general education

Prioritizing based upon need - not politics.

Lack of security for students and teachers in a building like OWEN Marsh without walls on inner circles ... library and classes

What happens first? Can we get started right away with smaller improvements that make a difference, such as working water fountains and sinks so kids can be more efficient and not waste learning time? Prioritize getting more space for learning

Timeline

The plans are not concrete therefore we don't know how much it will cost where it comes from how long it's going to take and to whom gets what first. My personal opinion start with what schools need it most the ones by the most impoverished areas.

Traffic patterns for high schools

Cost

Voting and selecting a plan without any idea of where the money will come from

changing demographics of student body

The locations are not feasible for those who do not have transportation and there is no high school ftr west.

cost/location

That it will take so long to finish master plan that modern ideas are then obsolete

Will this draw people to our school district?

\$\$\$, location of new LHS, could administrative Center be moved to LHS, equity between three high schools

Plans do not address the district's major needs at the elementary level.

Overall community backing

The high speed rail, if LHS stays at its present location.

Convincing the taxpayers that facilities are important, including athletic facilities

Timeline

Building community support

Equitable opportunities across the board for all

The cost The disparity between the high schools, even after upgrades

The cost and how will it affect the economic life of educators

What concerns you most about this plan?

What if the money doesn't come through? I really want all the new athletic buildings centrally located. It doesn't seem right to have athletic fields so far west away from ALL 3 high schools.

I fear lack of support because people want more for their school.

Continued division and competition among schools for resources and success.

The Republicans in this town will fight tooth and nail to stop this city's advancement.

We all want new schools. But will the people who "want them" be willing to pay for them?

Reaching the 99% of the community that has not participated so far....

Does the "community" really understand the state of disarray with our facilities in D 186?

Convincing the public to approve a county-wide sales tax for education.

Equal distribution of resources & community buy-in

That the timing of the implementation will not be equitable.

Money

Getting the most impact from this financial stretch

The citizens of Springfield actually getting behind the plans and supporting them full through

\$\$\$\$\$

Running out of money and picking only certain projects

Money

Transportation costs for athletics

Community support

Just ensuring equity and it being too far in the future.

Equity

That there are plans that don't address serious needs of programs and buildings.

That nothing will happen at all. Another 'study on a shelf'

Housing students when renovations are occurring

Getting started and not just keep talking about it

The time it will take may cause a loss of interest

The cost and the timeline for each project

Logistics of where students will go as schools get remodeled, built, etc.

What is prioritized

Accomplishing all the goals

Money and fairness

Lack of details.

Community support

Prioritization

Equity between schools priority

Cost and when it will happen.

Will the taxpayers support?

Cost and source of revenue

Time and cost

Where is the money coming from?

\$\$\$

\$

How are we going to pay for it

Time frame

Timeframe

Timeline and cost

Cost

Financial aspects

Llamas need to be involved.

What excites you most about this plan?

Community wide participation, updated facilities and new facilities. Possibility of vision being realized. We have needed to have this discussion for a while. We need upgraded/new facilities. Our educators and students deserve it. Now to have buy in from the community.....

New facilities More opportunities for athletic completions \$\$ generating opportunities for athletic events

The prospect of new construction and upgraded athletic facilities.

Future students learning in updated/new facilities.

New spaces! New facilities!

Pride in our facilities

Getting started. Forward movement for our city. Making kids a priority in our city and increasing usage of the facilities.

Adequate facilities for our students

Updated facilities that support student learning

Finally some equitable access to 21st century facilities for our students and communities

Bringing our facilities to be on par with surrounding districts. Changing the exteriors of our buildings to reflect the great things that are happening inside our buildings.

That 186 is in the process of offering up-to-date opportunities to our students. They deserve state-of-the-art facilities & athletics that surrounding areas have.

It makes Springfield a city where I want to raise my family, as opposed to moving to a surrounding area with better facilities

Bringing the facilities up to date

All of it. The facilities should match the good things happening on the inside.

The opportunity for increased equity within the district and the possibility of improving outcomes for students through improved facilities

The opportunity for all 3 high schools to have equal access to athletic fields & equalize the facilities.

Ability to upgrade multiple facilities through the next few years

Catching our facilities up with neighboring districts.

Updated HS facilities!

A new Sense of excitement sending positive economic and emotional shivers though this very deserving community

The community involvement although the group attending does seem to heavily skew towards district employees.

The investment for community, families, and students to come.

So far the work has been done well and the overall team is building good momentum that will need to continue to surge - this can be done and as a community we need to really work to move it ALL to the next level....

The community engagement and developing a plan

up to date buildings in our community

Making our community more appealing

community involved decision

Getting the community involved with the Springfield schools

Community involvement

The end result. Having an idea that will benefit most the children and after that the whole community

Elementary students will take great pride in their learning (scores will increase) while they are working in NEW buildings! All individuals are more positive and work ethics are better in cleaner and updated buildings...

Sports complex and new learning environments

Mix of renovation with new construction. Expansion of has campus. Potential for new high school facility on north end.

1. New space for future generations 2. Being able to compete in sports with the best in the state

New opportunities for students with technology and space!

New construction, jobs, progress enhancing all facets of Learning.

Building new elementary schools and expansion of early learning programs.

The opportunity to have new and updated buildings!

New learning spaces

It's new! That brings energy.

Getting something NEW for our students!!!!

Laketown & Hazel Dell new school!

Having new schools and more space

The new academic and athletic opportunities

Pride for our district. Making our district competitive from a real estate perspective.

The pride it can bring.

Forward thinking prospects

Moving 186 forward and updating older schools

Moving 186 forward

What excites you most about this plan?

Finally forward thinking!

Rushed decision making process. Not enough info provided in public input meeting keeping education in this area competitive

Lanphier in safer area/configuration

In a city known for history, this is progress. People have to be willing to fund it.

It will be good for the city.

The llamas, I mean children, will have a big place to roam

That people care about Springfield Maybe parents and kids will care more about their school and try harder

HazelTown!! Woo!!

Having a outline for the future.

level the "playing field" for Springfield compared to surrounding communities

The buildings better matching the excellence that takes place inside of them

Equitability within the district and competitive with other districts

Upgrade for our kids

Athletic Complex and updated schools

Provide better opportunities for students. Improve the perception of District 186.

Updates to SHS. It will be nice to have bathrooms built in this century.

Improvement and promoting our district

Citizens being allowed to participate in decision making.

Upgrade to all buildings.

The upgrades for our kids... cause it is really all about the kids

Athletic field houses and GAP improvements

SEEING BEAUTIFICATION ON OUR SCHOOL PROPERTIES

The possibility that all schools can get some much needed updates!

Updated learning spaces for students.

That so many came together to shape it

Potential for excellence

A vision to rally around

I am excited about the opportunity that Springfield has to be competitive with other school districts in the area.

Better learning environments for students

I'll get excited when I see it

The focus on how kids learn and how the design of spaces can influence that learning

Modernizing the district

Getting our district on the path to updates for our future students

Having the opportunity to dream and plan a great future for our children.

Giving a strong foundation to building the future.

A plan exists!!!

There's a plan.

The future opportunities that students from Springfield will have as they pursue their individual careers

Opportunity for students.

21st century learning

Great things for our future!

The possibilities for our future students

Nothing.

LLAMAS. THE LLAMAS ARE THE BEST PART

Opportunities for students

More space
